

DIGITAL AGENCY

Senior UX Designer

Cologne

In order to support our creative team in Cologne, we are looking for an experienced User Experience Designer (m/f), who takes care of the high-quality user guidance and information structure of our digital projects. The Senior UX Designer at Demodern works as an advisor and consultant on future-oriented interaction concepts and ensures the best possible user dialogue with routine, knowledge and empathy. Very good communicative skills are a must-have not least to convey concepts, ideas and applications of the projects within the team and opposite the customers.

Requirements

- Creation of UX concepts taking into account the objectives of our customers and their users
- Translation of ideas in wireframes and prototypes - for all areas of interaction
- Work with individual user scenarios (personas, applications)
- Implementation of testings to improve user management
- Development of UI Guidelines
- Consulting and monitoring of the entire project, from the initial idea to the production
- Evaluation and research of innovative technologies in all digital fields

Tasks

- 5+ years of design or UX design experience in a digital agency
- Proven relevance to successful online projects
- Speed, efficiency and very good knowledge in creating wireframes
- Experience in writing concept presentations
- Ability to collaborate and integrate design, engineering and project management
- In-depth knowledge of ideas and user experience across all digital channels: websites, e-commerce, mobile, social media, rich media and video

Please send your application not via snail mail, but via mail to jobs@demodern.de
