

DIGITAL AGENCY

Frontend Web Development

Hamburg

We are looking for a creative native digital to enrich our team in the area of creative coding. You'll be in charge of frontend development of interactive projects, technical research and conception, but foremost pushing interaction and web technologies together with a very skilled and passionate team of designers and developers forward. You'll have the chance to bring in your own ideas and not only develop websites, but interactive experiences of all sorts and integrate into a passionate team, who all share the same goal, creating the best possible experience. You created medium to advanced frontend websites and played around with different engines.

Please contact us by email and include some work samples testifying to your abilities and your résumé. Get in touch with us if you feel we could all benefit from knowing each other.
