

DIGITAL AGENCY

## Unity/Unreal Developer

Cologne

We are looking for an experienced (2-3 years professional experience) Unity and/or Unreal 3D developer to strengthen our ambitious and dynamic team. We offer you a job in which you can share your fascination and passion for digital experiences together with our team of screen-, motion- and UX designers as well as developers.

We create AR/VR apps, projection mapping experiences, In-Store and museum installations, tradeshow apps, games - anything in the digital 3D real really.

We are looking forward to receiving your application with work samples, a salary presentation and a possible entry date.

**Required:**

- Excellent experience in shading, lighting and animation in the game engine Unreal and/or Unity3D.
- Experience in animation / motion design
- Sound knowledge of linear algebra, performance optimization a plus
- Excellent knowledge of C++ and C#
- Experience in the development of in-house tools to increase efficiency
- Very good knowledge of German and/or English spoken and written
- Proactive and independent work
- Teamwork
- Desirable: programming of shaders (Cg / HLSL / GLSL)
- Desirable: Experience in developing apps for Android / iOS
- Desirable: Experience in Python

Please send your application not via snail mail, but via mail to [jobs@demodern.de](mailto:jobs@demodern.de)
