

CREATIVE TECHNOLOGIES

Creative Technologist

Hamburg

We are looking for a creative developer (m/f/d) who is up to varied tasks, imaginative concepts and especially new technologies. You are familiar with game engines and have an understanding of computer graphics and render pipelines. Whether it's Python, Go or Node doesn't matter to you and you don't shy away from C++ either, you choose the right language & tools for the job. Furthermore, you are keen on AR/VR projects, installations, you never stop learning and you want to develop as an integral part of an interdisciplinary team? Then we are looking forward to getting to know you!

What we offer

- International working environment
- Innovative projects with a wide reach
- Flexible work environment with remote & office work
- Modern tools like Slack & Discord
- Flat hierarchies and agile models & methods
- Regular team & company events
- Individual training and education

Your tasks

- Development of interactive applications and installations
- Exploration of new technologies and prototyping
- Consulting and inspiration in concept and design
- Independent and collaborative work in a team

Must haves

- 1-2 years of professional experience, but at least a completed, suitable degree with a computer science background and proven technological diversity
- Advanced experience in game engines, preferably Unreal
- Knowledge in the areas of agile development, CI/CD and rapid prototyping
- Basic knowledge of web development (HTML, CSS, JS)

Nice to haves

- Mobile app development (iOS/Android, nativ oder z.B. react-native)
- Interested in IoT, microcontroller und electrical engineering
- Experience in Node and frontend frameworks such as React

Please send your application not via snail mail, but via mail to jobs@demodern.de
