

CREATIVE TECHNOLOGIES

## Python and Django developer

Cologne

We are looking for a talented Python and Django developer (m/f/d), to support us in our location in Cologne. We are looking for somebody who wants to push things forward and help us build and extend backend systems for our customer projects.

We are not building "websites", we are creating digital experiences, that leave our users fascinated, moved and impressed. We are not limiting our creative energy to just the web: We are building desktop, mobile and game console apps, physical installations and whatever comes to our minds.

We are looking forward to your application with a CV, your salary expectations and a potential start date.

### Basics

- High quality, secure and performant code
- Ability to write well structured and maintainable code, as well as improving existing code bases (boycout rule)
- Excellent analytical abilities
- Experience with agile Methodologies like SCRUM
- Ability to be a team player (including working well with people who are not developers)
- Ability to turn ideas into deployed code

### Must have:

- 3+ years experience with Python 3
- 2+ years experience with Django
- Designing, documenting and developer APIs (REST/GraphQL)
- Designing and implementing data models
- Working with databases (wie PostgreSQL/MySQL/MongoDB)
- Working with cloud services (mostly AWS), especially AWS Lambda
- Integrating customer's APIs

### Nice to have:

- Additional programming languages (like Typescript, Python, Go, Nim, ...)
- Realtime Communication (Websockets / WebRTC)
- Experience implementing anti spam and anti fraud features
- Gitlab CI/CD
- Docker / Terraform / Kubernetes
- Cloud-Umgebungen wie AWS / Azure / GCP

Please send your application not via snail mail, but via mail to [jobs@demodern.de](mailto:jobs@demodern.de)
