Internship UX Design

Cologne

Demodern is looking for an intern to support us in our conceptual work starting as soon as possible. As part of the team, you will be designing the user experience of diverse digital projects: From interactive installations, VR or AR applications to responsive web experiences. We are looking for someone with a passion for user-centered design that can support our UI designers with user flows, wireframes and more conceptual thinking. We don't need you for your status quo: We are looking for someone with a drive for digital to bring in their personality and to push things forward. If that is you, you will find plenty of love and passion in return.

Please submit your application including your portfolio.

Requirements

- You are enthusiastic and have at least 4 months time
- You have empathy and a good understanding for trends
- You are familiar with common design tools for wireframing and prototyping, like Illustrator, Sketch, Invision, Axure or others
- You are not afraid to get acquainted with new technologies
- You show commitment and ability for team work
- You feel passionate about your work
- Ideally, you are in the 3rd year of your Bachelor studies or in your Masters

Please send your application not via snail mail, but via mail to jobs@demodern.de
