

CREATIVE TECHNOLOGIES

## Creative Engineer

Hamburg

We are looking for a creative developer who is up to varied tasks, imaginative concepts and new technologies. You are an ace in the frontend, you develop interactive and responsive interfaces, but you are also not afraid to build a quick prototype in Unity or to set up a node middleware or a CMS for the next project? If all of this applies to you, you also never plan to stop learning, and you want to grow with us as part of the team, then you've come to the right place.

### Your profile:

- You already have some work experience in the design and/or development industry
- You have excellent knowledge in JavaScript ES6 or TypeScript
- You have a good command of React and Node or another framework
- You are confident in version control
- In the best case you are already working with ASW
- First experience with a 3D framework like Three.js or WebGL is advantageous
- On top, experience with Unity or Unreal would be desirable
- Skills in the backend would also be great

Send us your application and samples of your work to [jobs@demodern.de](mailto:jobs@demodern.de)

Please send your application not via snail mail, but via mail to [jobs@demodern.de](mailto:jobs@demodern.de)
